**GEN 3.5 METEOROLOGICAL SERVICES**

---

**3.5.1 RESPONSIBLE SERVICE**

3.5.1.1 The meteorological services for international air navigation are provided by the Meteorological Service Singapore of the National Environment Agency.

Post: THE DIRECTOR-GENERAL  
Meteorological Service Singapore  
Singapore Changi Airport,  
P.O. Box 8  
SINGAPORE819643

Tel: (65) 65457190 (HQ)  
(65) 62446133 / (65) 65422837 (MET Office)

Fax: (65) 65457192 (HQ)  
(65) 65425026 (MET Office)

AFS: WSSSYMYX

URL: [www.weather.gov.sg](http://www.weather.gov.sg)

3.5.1.2 The service is provided in accordance with the provisions contained in the following ICAO documents:

Annex 3 – *Meteorological Service for International Air Navigation*  
Doc 7030 – *Regional Supplementary Procedures Part 3 - Meteorology*

3.5.1.3 Differences to these provisions, if any, are detailed in subsection GEN 1.7.

**3.5.2 AREA OF RESPONSIBILITY**

3.5.2.1 Aeronautical meteorological services (MET) is provided for the Singapore FIR. For the following portions of Jakarta FIR, MET is jointly provided by Indonesia and Singapore:

The area bounded by 031727N 1052959E 012450N 1061648E 001030N 1045656E 000000N 1050340E 000000N 1044330E thence around the arc of a circle radius 90 NM centred on 011324N 1035124E to 013430N 1022353E 011300N 1033000E 011408N 1033142E 011200N 1033900E 011046N 1034015E 010800N 1034500E 011500N 1040000E 011800N 1043000E 012921N 1043441E 011947N 1044606E 021838N 1052205E 023641N 1051311E 024348N 1050854E 025010N 1051210E 031453N 1052619E 031727N 1052959E

Vertical limit: SFC to FL370

### 3.5.3 METEOROLOGICAL OBSERVATIONS AND REPORTS

| Meteorological Observations and Reports   |                                                                               |                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                       |                                                                                                            |

**3.5.4 TYPES OF SERVICES**

3.5.4.1 The Meteorological Office and Meteorological Watch Office at Singapore Changi Airport operate H24 and provide the following services for international air navigation:

- a) Full meteorological documentation and briefing for current operational planning for all flights operating out of Singapore Changi Airport via the Aviation Weather Services Portal at URL <https://www.weather.gov.sg/aviation>;
- b) Area meteorological watch over the Singapore FIR with the supply of meteorological information including SIGMET information to aircraft in flight through the Singapore ATS radio channels (see subsection AD 2.11);
- c) For the portions of airspace within the Jakarta FIR where MET is jointly provided by Indonesia and Singapore (see GEN 3.5 para 3.5.2.1), high level SIGWX forecasts are provided jointly with the Centre for Aviation Meteorology of BMKG; SIGMET and special air reports (ARS) are provided jointly with Meteorological Watch Office Jakarta;
- d) HF RTF VOLMET broadcasts of meteorological information (see page GEN 3.5-7), Aviation weather report with trend statement, strong low level vertical wind shear report and aerodrome warnings are also included in VHF ATIS broadcasts for Singapore Changi Airport (see page GEN 3.4-3);
- e) Meteorological information for ATS.

3.5.4.2 Weather briefing by a forecaster is available H24 to qualified flight operations personnel at the Meteorological Office at Singapore Changi Airport or via telephone at (65)62446133 / (65)65422837. Weather information is available online via the Aviation Weather Services Portal at URL <https://www.weather.gov.sg/aviation> ( see paragraph 9.2 for further details).

3.5.4.3 The Meteorological Office at Seletar Aerodrome operates H24 and provides meteorological documentation without briefing for international and general aviation flights operating out of Seletar Aerodrome.

3.5.4.4 Details of documentation supplied for each flight are determined by arrangement between the operator and the Meteorological Office. In general, the pilot-in-command is provided with documentation comprising one or more fixed-time prognostic streamline/istotach/spot temperature charts of standard isobaric surfaces appropriate to the cruising level (ICAO model IS), one of fixed-time prognostic significant weather chart code form and appropriate aerodrome forecasts in TAF code form.

3.5.4.5 Routine aerodrome forecasts received from other Meteorological Offices are normally included in meteorological documentation without modification. When a required aerodrome forecast is not received, a provisional forecast may be issued by the Meteorological Office providing the documentation.

3.5.4.6 After documentation has been issued and until take-off (i.e. the latest ETD notified to the Meteorological Office), the Meteorological Office at Singapore Changi Airport makes available amendments to the documentation. It is the responsibility of the operator's local representative or the pilot-in-command to obtain any pre-departure amendment(s) from the Meteorological Office at Singapore Changi Airport. The pilot-in-command may request pre-departure amendment(s) through the Singapore Changi Airport Control Tower.

3.5.4.7 Climatological Summaries for Singapore Changi (WSSS-48698) are available from the Meteorological Service Singapore.

**3.5.5 OBSERVING SYSTEMS AND OPERATING PROCEDURES AT SINGAPORE CHANGI AIRPORT AND SELETAR AERODROME****3.5.5.1 SINGAPORE CHANGI AIRPORT****3.5.5.2 RWY 02L/20R (Runway 1)**

3.5.5.2.1 Surface wind is measured by three ultrasonic wind sensors located as follows:

|                  | <u>DIST FROM END OF RWY</u> | <u>DIST FROM RWY CENTRELINE</u> |
|------------------|-----------------------------|---------------------------------|
| (i) One set at   | 406 metres north of RWY 02L | 120 metres                      |
| (ii) One set at  | Middle of runway            | 121 metres                      |
| (iii) One set at | 381 metres south of RWY 20R | 121 metres                      |

3.5.5.2.1 RVR observations are made by means of three sets of transmissometers, located as follows:

|         | <u>DIST FROM END OF RWY</u> | <u>DIST FROM RWY CENTRELINE</u> |
|---------|-----------------------------|---------------------------------|
| 1st set | 446 metres north of RWY 02L | 120 metres                      |
| 2nd set | Middle of runway            | 121 metres                      |
| 3rd set | 421 metres south of RWY 20R | 121 metres                      |

3.5.5.2.2 RVR is reported in steps of 25 metres between 0 and 400 metres, 50 metres between 400 and 800 metres and 100 metres between 800 and 1,500 metres.

3.5.5.2.3 Surface wind report in METAR and SPECI is taken from the wind sensor at the southern end of RWY 02L (with the sensor at the northern end of RWY 02C/20C as backup).

### 3.5.5.3 RWY 02C/20C (Runway 2)

3.5.5.3.1 Surface wind is measured by three ultrasonic wind sensors, located as follows:

|                  | <u>DIST FROM THRESHOLD</u>  | <u>DIST FROM RWY CENTRELINE</u> |
|------------------|-----------------------------|---------------------------------|
| (i) One set at   | 414 metres north of RWY 02C | 130 metres                      |
| (ii) One set at  | Middle of runway            | 130 metres                      |
| (iii) One set at | 413 metres south of RWY 20C | 128 metres                      |

3.5.5.3.2 RVR observations are made by means of three sets of transmissometers, located as follows:

|         | <u>DIST FROM THRESHOLD</u>  | <u>DIST FROM RWY CENTRELINE</u> |
|---------|-----------------------------|---------------------------------|
| 1st set | 449 metres north of RWY 02C | 120 metres                      |
| 2nd set | Middle of runway            | 120 metres                      |
| 3rd set | 427 metres south of RWY 20C | 120 metres                      |

3.5.5.3.3 RVR is reported in steps of 25 metres between 0 and 400 metres, 50 metres between 400 and 800 metres and 100 metres between 800 and 1,500 metres.

### 3.5.5.4 RWY 02R/20L (Runway 3)

Surface wind is measured by three ultrasonic wind sensors located as follows:

|                  | <u>DIST FROM THRESHOLD</u>  | <u>DIST FROM RWY CENTRELINE</u> |
|------------------|-----------------------------|---------------------------------|
| (i) One set at   | 428 metres north of RWY 02R | 132 metres                      |
| (ii) One set at  | Middle of runway            | 121 metres                      |
| (iii) One set at | 435 metres south of RWY 20L | 132 metres                      |

3.5.5.4.1 RVR observations are made by means of three sets of transmissometers, located as follows:

|         | <u>DIST FROM THRESHOLD</u>  | <u>DIST FROM RWY CENTRELINE</u> |
|---------|-----------------------------|---------------------------------|
| 1st set | 421 metres north of RWY 02R | 120 metres                      |
| 2nd set | Middle of runway            | 121 metres                      |
| 3rd set | 425 metres south of RWY 20L | 120 metres                      |

3.5.5.4.2 RVR is reported in steps of 25 metres between 0 and 400 metres, 50 metres between 400 and 800 metres and 100 metres between 800 and 1500 metres.

### 3.5.5.5 Wind Shear Observations (Singapore Changi Airport)

3.5.5.5.1 Horizontal low level wind shear observations are measured continuously by a system consisting of 15 surface wind sensors, MET Doppler X, S and C band weather radars and two wind lidars located in Singapore Changi airport and its vicinity.

3.5.5.5.2 ATC will pass to all aircraft taking off or landing for the next 1/2 hour from the time of report whenever microburst or wind shear of intensity 15 knots or greater is observed/reported.

3.5.5.5.3 The phraseology used by ATC to warn pilots of the presence of wind shear of intensity between 15 and 30 knots is:

“..... (callsign) WIND SHEAR WARNING  
STRONG LOW LEVEL WIND SHEAR OBSERVED IN THE  
VICINITY OF  
CHANGI AIRPORT AT ..... (time)”

3.5.5.5.4 The phraseology used by ATC to warn pilots of the presence of wind shear of intensity greater than 30 knots is:

“.....(callsign) WIND SHEAR WARNING  
SEVERE LOW LEVEL WIND SHEAR OBSERVED IN THE  
VICINITY OF  
CHANGI AIRPORT AT .....(time)”

3.5.5.5.5 The presence of wind shear will also be broadcast in the ATIS for the next half an hour.

### 3.5.6 SELETAR AERODROME

3.5.6.1 Surface wind is measured by ultrasonic wind sensors at ends of runway. Surface wind report in METAR and SPECI is taken from measurements of the ultrasonic wind sensor at RWY 03.

3.5.6.2 Wind Shear Observations (Seletar Aerodrome)

3.5.6.2.1 ATC will pass to all aircraft taking off or landing for the next 1/2 hour from the time of report whenever microburst or windshear of intensity 15 knots or greater is observed/reported.

3.5.6.2.2 The phraseology used by ATC to warn pilots of the presence of wind shear of intensity between 15 and 30 knots is:

“.....(callsign) WIND SHEAR WARNING  
STRONG LOW LEVEL WIND SHEAR  
OBSERVED IN THE VICINITY OF  
SELETAR AIRPORT AT .....(time)”

3.5.6.2.3 The phraseology used by ATC to warn pilots of the presence of wind shear of intensity greater than 30 knots is:

“.....(callsign) WIND SHEAR WARNING  
SEVERE LOW LEVEL WIND SHEAR  
OBSERVED IN THE VICINITY OF  
SELETAR AIRPORT AT .....(time)”

### 3.5.7 NOTIFICATION REQUIRED FROM OPERATORS

3.5.7.1 It is the responsibility of the operator or the pilot-in-command to notify the meteorological office of any flight for which meteorological documentation is required (ref. ICAO Annex 3, paragraph 2.3). As much prior notice as possible should be given, and at least one hour notice at Singapore Changi Airport and two hours at Seletar Aerodrome would be required for nonscheduled flights.

### 3.5.8 AIRCRAFT REPORTS

#### 3.6 AIREP

3.6.1 Special aircraft observations shall be made and the reports transmitted as necessary to ATC.

3.6.2 Special aircraft observations of pre-eruption volcanic activity, volcanic eruption or volcanic ash cloud shall be recorded on the special Air-Report of Volcanic Activity form which can be downloaded from URL <https://aim-sg.caas.gov.sg>. A copy of the completed Volcanic Activity Report shall be delivered by the operator or a flight crew member, without delay, either personally or by telephone facsimile (TEL: 62446133 / 65422837 or FAX: 65429978 / 65425026) to the Meteorological Office, Singapore Changi Airport.

#### 3.7 REPORTING OF LOW LEVEL WIND SHEAR

3.7.1 Pilots encountering wind shear shall report to ATC as soon as possible.

3.7.2 When reporting wind shear on radiotelephony, the information should be transmitted in this order:

- a) Aircraft callsign;
- b) WIND SHEAR report;
- c) Time (of wind shear occurrence);
- d) Position (of wind shear);
- e) Intensity (moderate, strong or severe);
- f) Average height of wind shear layer.

3.7.3 On receipt of a wind shear report from a pilot, ATC will pass it to other aircraft in the vicinity. The following phraseology will be used:

“WIND SHEAR WARNING  
ARRIVING (or DEPARTING) ..... (type of aircraft)  
REPORTED ..... (moderate, strong, severe)  
WIND SHEAR IN APPROACH (or DEPARTURE)  
RUNWAY ..... (number) AT ..... (time)  
HEIGHT OF WIND SHEAR LAYER ..... (feet)”

3.7.4 The presence of wind shear as reported by a pilot will also be broadcast in the ATIS for the next half an hour unless subsequent reports indicate that wind shear no longer exists.

### 3.7.5 VOLMET SERVICE

| VOLMET SERVICE  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                             |                                   |           |                                                                                                                                                                                                                                                     |                                                                                                                         |

**3.5.6 SIGMET SERVICE****3.6 General**

3.6.1 For the safety of air traffic, the Meteorological Watch Office of Singapore maintains an area meteorological watch and warning service. This service consists partly of a continuous weather watch within the Singapore FIR and the portions of airspace within the Jakarta FIR where MET is jointly provided by Indonesia and Singapore (see GEN 3.5 para 3.5.2.1), and issuance of appropriate information (SIGMET) by Meteorological Watch Office of Singapore and partly of the issuing of warnings for Changi Airport.

| SIGMET SERVICE                              |                               |                                   |                                      |                                |                        |                                   |

\* For the portions of airspace within the Jakarta FIR where MET is jointly provided by Indonesia and Singapore (see GEN 3.5 para 3.5.2.1), SIGMET is jointly provided by the Meteorological Watch Offices of Jakarta and Singapore. The Meteorological Watch Offices of Jakarta and Singapore have implemented agreed coordination procedures in accordance with the procedures in the ICAO Asia/Pacific Regional SIGMET Guide and Operational SIGMET Coordination to ensure that there is no conflict in the SIGMETs published by both Meteorological Watch Offices.

**3.7 Area Meteorological Watch Service**

3.7.1 The area meteorological watch service is performed by the Meteorological Service Singapore.

3.7.2 The Meteorological Service Singapore issues information in the form of SIGMET messages about the occurrence or expected occurrence of one or several of the following significant meteorological phenomena:

- thunderstorms \*
- severe turbulence
- severe icing
- severe mountain waves
- heavy sand storm/dust storm
- volcanic ash cloud
- tropical cyclone

\* Area of widespread cumulonimbus clouds or cumulonimbus along a line (squall line) with little or no space between individual clouds, or cumulonimbus embedded in cloud layers or obscured by haze.

3.7.3 The SIGMETs are issued in abbreviated plain language using ICAO abbreviations and are respectively numbered consecutively for each day commencing at 0001. Their period of validity is generally not more than 4 hours and less than 6 hours from the time of transmission.

3.7.4 SIGMETs issued by the Meteorological Service Singapore are transmitted to adjacent MWOs in accordance with regional air navigation agreements and used by ATS units in Singapore .

**3.8 Warning Service**

3.8.1 Aerodrome warnings for Changi Airport are issued by Meteorological Service Singapore if one or several of the following phenomena are expected to occur at the airport:

- squall
- thunderstorm
- hail
- tornado
- horizontal visibility and/or RVR of 800 metres or less
- mean surface wind speed of 25 knots or more
- wind gusts of 35 knots or more
- cloud of BKN or OVC amount with base 500 ft or less

3.8.2 The warnings are:

- for the protection of parked and moored aircraft,
- for the protection of equipment at the airport, and
- for the safety of arriving and departing aircraft.

3.8.3 The warnings are issued in English and are distributed in accordance with a distribution list which has to be agreed upon locally. In order to guarantee rapid dissemination of the warnings, the distribution list to be used shall, as far as possible, contain only one recipient for an interested group; this recipient will be responsible for the further dissemination of the warning within the group.

3.8.4 SIGMET is disseminated by directed transmissions to aircraft through general calls by the Singapore Area Control Centre for Singapore FIR, and the portions of airspace within the Jakarta FIR where MET is jointly provided by Indonesia and Singapore (see GEN 3.5 para 3.5.2.1).

### 3.8.5 OTHER AUTOMATED METEOROLOGICAL SERVICES

3.9 Besides VOLMET and ATIS broadcasts, airline operators can obtain access to various operational meteorological information through the Aviation Weather Services Portal and automated faxing service.

3.10 The Aviation Weather Services Portal is free to airlines and flight operators for flights departing from Singapore Changi or Seletar Airports. It is accessible via the "Login" link at URL <https://www.weather.gov.sg/>. A registered user account is required for the access. For registration, please email to [MSS\\_Aviation\\_Enquiries@nea.gov.sg](mailto:MSS_Aviation_Enquiries@nea.gov.sg).
